DETAILED ACTION

1. This office action is responsive to communication filed on December 17, 2008. Claims 18-21 are pending in the application.

Allowable Subject Matter

2. Claims 18-21 allowed.
3. The following is an examiner's statement of reasons for allowance:

Consider claim 18, the prior art of record teaches a computer program, stored on a computer readable medium for making a computer initialize an image transmission system, authenticate a user and image pickup apparatus, connect the image pickup apparatus to a viewing apparatus, identify the image pickup apparatus via an identification number, obtain a decryption key, transmit an image request, receive an image subsequent to the image transmit request, decrypt the image, and display the image on a viewing apparatus.

However, the prior art of record does not teach nor reasonably suggest, as a whole, that the initializing of the image transmission system comprises connecting an image pickup apparatus and a memory card to a key generating apparatus, transmitting an identifying number from the image pickup apparatus to the key generating apparatus, registering the identifying number from the image pickup apparatus at the key generating apparatus and at an authentication server; and generating an encryption and decryption key unique to the image pickup apparatus.

Claims 19 is allowed as depending from an allowed claim 18.

Consider claim 20, the prior art of record teaches an image transmission system for transmitting an image via a network comprising an image pickup apparatus connected to a key generating apparatus comprising a recording unit for storing an identifying number and an encryption key from the key generating apparatus, an image viewer with an interface for requesting authentication by an authentication server of an image capture apparatus accessible by a user, connecting the image pickup apparatus to the viewing apparatus, a memory for obtaining a decryption key from the removable storage medium, a decrypting unit for decrypting receiving images, and a display for displaying the decrypted images.

However, the prior art of record does not teach nor reasonably suggest, as a whole, that the key generating apparatus comprises a network interface for registering the identifying number from the image pickup apparatus at an authentication server, a recording unit for storing the the-identifying number from the image pickup apparatus, an encryption key generation unit for generating an encryption and decryption key unique to the image pickup apparatus, and an interface for storing the decryption key in a removable storage medium.

Claim 21 is allowed as depending from an allowed claim 20.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any objections made to the claims by the examiner are hereby removed in view of Applicant's response.
